ABSTRACT:

PURPOSE: To efficiently obtain the subject fats and oils without carrying out the deacidifying treatment by hydrolyzing the fats and oils with plural kinds of lipases and removing the liberated fatty acids other than long-chain highly unsaturated fatty acids and glycerol.

CONSTITUTION: This method for producing fats and oils is to hydrolyze the fats and oils with two or more kinds of lipases such as lipases derived from the genera Rhizops, Chromobacterium, Mucor, Aspergillus, Achromobacter, Alcaligenes, Candida and Pseudomonas and remove the liberated fatty acids other than long-chain highly unsaturated fatty acids and glycerol.
